HEAT EXCHANGERS &  
RIPENING SOLUTIONS

# Global leader for state-of-the-art ripening systems

**Interko is the world leader for the design, manufacture and installation of custom cooling and ripening systems for fresh fruit. Founded over 40 years ago, Interko develops reliable systems that are built to last. Since its creation, the company has installed over 5,000 ripening rooms for bananas, avocados, mangoes and papayas, the earliest of which are still in operation and performing well today.**

Interko has a well-earned reputation for quality ripening at attractive overall costs and the development of systems that require only minimal maintenance. Clear instructions mean that the systems can be up and running quickly. Gassing systems and gas-tight doors can be delivered as part of the package. Installation can be coordinated by one of our local partners. Assembly can also be arranged.

In addition to conventional systems, Interko also produces a unique system that is ready to use off the shelf: the Lock-Sock® system. This moveable system offers numerous possibilities for semi-permanent configurations with low installation costs.

By choosing Interko you benefit from premium fruit quality, a longer shelf-life, minimal product losses and lower operational costs. We are proud to provide solutions to ripen just a few boxes of bananas in the smallest room to as many as 72 pallets in a large room and everything in between.

Please contact us to find out how you could benefit from quality ripening systems you can trust.

## **Main focus of business**

Ripening systems for bananas, mangoes, papayas and avocados

## **Systems**

Everything from a plug and play ripening solution in a basic room to high-end, multi-layer ripening rooms for big distribution centres used by established retailers, distributors and importers

## **Clients**

Interko works with a wide range of clients throughout the world, from family-owned businesses and service providers to large distributors, the big banana brands and retailers
